AN EXCEPTIONAL SENSORY JOURNEY INTO THE HEART OF THE CORSICAN MAQUIS

For us, the idea of sharing the island's extraordinary wealth of flora was an obvious choice. For you, we gathered a cornucopia of plants from the most untouched and well-preserved parts of our island. Our NUCCA Line, developed in perfect synergy with nature and in absolute harmony with the environment, offers you exclusive skin care products and treatments.

NUCCA is an all-natural, complete and effective range offering the benefits of rare active ingredients derived from more than 100 Corsican plants and revitalising minerals. Each ritual is personalised with essential oils applied using the palms of the hands and a beverage made of plant extracts selected to complement your treatment.

Created with extreme attention to detail, the NUCCA protocols are based on specific manual application methods developed in collaboration with an experienced therapist particularly passionate about the world of spas.

Our "homemade" brand takes you on a spectacular olfactory journey enhanced with revitalising and soothing sensory interludes.

Hélène and Lise Canarelli

N

The 100% natural NUCCA cosmetic range is sold in the spa at the Grand Hôtel du Cala Rossa, at the Domaine de Murtoli and in our online store www.nucca.fr.

In natural cosmetology, the oils used are unrefined, and contain live plant molecules and pigments.

The colour palette of ingredients used in making our products goes from white to red, through green, yellow and orange.

This superb spectrum of colours can develop differently from one batch to another depending on where the plants are picked and the temperatures experienced during growth.

The molecules also develop according to the season, the growing environment of the oleaginous plants and sunshine. Any small changes in colour and smell that appear over time are evidence of the quality of the ingredients used, and in no way reflect deterioration of the product. In fact, quite the contrary.

NUCCA ENVIRONMENTAL CODE

INTENTIONALLY: A BOTTLE WITHOUT AN ORGANIC LABEL

NUCCA has intentionally not engaged in an organic certification process, aware that it has limitations due to oversubscription both by brands and by the various certifying organisations. We select the most environmentally responsible raw materials from our local Corsican growers. The remainder is sourced from our network of producers, whose ethics are perfectly in tune with our values.

SCIENTIFICALLY CERTIFIED IN JAPAN

NUCCA has chosen to submit its entire range to analysis in the world's most discerning market. In 2021, the JFRL laboratories in Tokyo scientifically attested that our raw materials are completely free of chemical micro-contamination from the field to the bottle. More than a label, scientific evidence!

A HIGH-PERFORMANCE LABORATORY DEDICATED TO CLEAN BEAUTY

Active and vigilant, we are involved in all production stages of our range, from sourcing to retail of our clean beauty products.

OUR RAW MATERIALS - LIVING MOLECULES

NUCCA's 100% natural cosmetics use only unrefined oils that contain live plant molecules and pigments. The colours, molecules and fragrances of our products can change with the harvest, according to the season and the oil-yielding plants' exposure to sunlight. These differences are inherent to the 100% natural origin of our IQN100® complex. As with a good wine, NUCCA's ingredients are actively enhanced during preparation.

PACKAGING AND TECHNOLOGY: ECO-FRIENDLY FROM EVERY ANGLE

Our entirely recyclable Airless® bottles and opaque tubes protect our products from air and light, thus forming a barrier against contamination, deterioration and oxidation. With an Airless® bottle, wastage is reduced to a minimum: at least 98% of the content is used.

Luxury Clean Beauty, in harmony with nature.
